Quickly reload pages through your library's EZProxy.

Many universities use EZProxy to allow its students access to various online databases. This extension adds a button to Chrome which allows for a quick way to reload the current page through your EZProxy system.

All it does is pass the URL to your library's EZProxy login URL. For example:  
`http://ieeexplore.ieee.org/`  
would change to:  
`http://www.library.drexel.edu/cgi-bin/r.cgi?url=http://ieeexplore.ieee.org`
