CHE COSA È UNA NORMA TECNICA?

Secondo il *Regolamento UE 1025* del Parlamento Europeo e del Consiglio del 25 ottobre 2012 sulla normazione europea, per "norma" si intende:

una specifica tecnica, adottata da un organismo di normazione riconosciuto, per applicazione ripetuta o continua, alla quale non è obbligatorio conformarsi

Dal sito UNI www.uni.com

making life safer and simpler ... ovvero *"come fare bene le cose"*

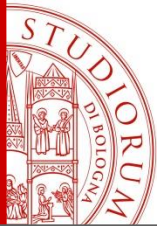

Le norme tecniche sono documenti che definiscono, le caratteristiche di qualità, di prestazione, di interoperabilità, di protezione ambientale, di salute, di sicurezza, di dimensione, ma anche la terminologia, i simboli, le prove e i metodi di prova, e moltissimo altro di:

- **prodotti industriali**

ma anche di:

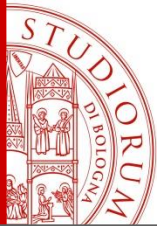

- **processi di produzione**

- **servizi**

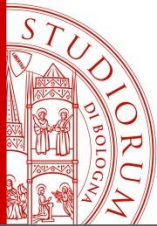

Come?

- a **regola d'arte** secondo lo stato più avanzato delle conoscenze tecnico/tecnologico di un settore
- coinvolgendo **esperti** dei diversi settori
- garantendo la **compatibilità** di prodotti, processi, scambi commerciali o comunicativi e favorendo processi di **innovazione**
- **volontarie**, ma quando vengono richiamate in un provvedimento legislativo si attiva una sinergia, che può arrivare fino a renderne l'applicazione obbligatoria

Le 4 parole chiave dell'UNI

- **Consensualità:** la norma tecnica deve essere approvata con il consenso di coloro che hanno partecipato ai lavori
- **Democraticità:** deve essere data la possibilità di partecipare ai lavori a tutte le parti economico/sociali interessate
- **Trasparenza:** il processo di normazione deve seguire un iter di approvazione riconosciuto che consenta l'individuazione delle tappe fondamentali, tenendo il progetto stesso a disposizione degli interessati
- **Volontarietà:** la norma costituisce un riferimento che le parti interessate si impongono spontaneamente

Norme e enti normatori

- ***norma internazionale:*** *norma adottata da un organismo di normazione internazionale;*
 - ISO International Organization for Standardization
 - IEC International Electrotechnical Commission
 - ITU International Telecommunication Union (
- ***norma europea:*** *norma adottata da un'organizzazione europea di normazione;*
 - CEN European Committee for Standardization
 - CENELEC European Committee for Electrotechnical Standardization
 - ETSI telecommunications, broadcasting and other electronic communications networks and services
 - Se elaborate su mandato della Commissione EU sono “armonizzate” e pubblicate sulla GUE
- ***norma nazionale:*** *norma adottata da un organismo di normazione nazionale.*
 - BSI British Standards Institution
 - UNI Ente Nazionale Italiano di Unificazione
 - CEI Comitato Elettrotecnico Italiano
 - DIN Deutsches Institut für Normung
- ***norma di altri enti con autorità riconosciuta***
 - ASTM International - American Society for Testing and Materials
 - IEEE Institute for Electrical and Electronic engineers

Il nome della norma

- Dal punto di vista bibliografico la norma è una monografia
 - titolo
 - ISBN (solo BS)
 - codice identificativo alfanumerico, es.: **ISO 11979-3**
 - **ISO** denominazione o acronimo dell'ente promotore
 - **11979-3** un numero progressivo nella raccolta ISO
- Quando uno standard viene recepito da un altro ente normatore mantiene nel codice identificativo traccia di questo passaggio: **BS EN ISO 11979-3 / UNI EN ISO 11979-3**
 - **11979-3** numero progressivo nella «collana» **ISO**
 - **ISO** ente promotore
 - **EN** ente che ha successivamente recepito lo standard
 - **UNI** o **BS** ultimo ente ad avere recepito lo standard

Luft- und Raumfahrt - Elektrische Rundsteckverbinder,
kontaktgeschützt, Drei-gangige Gewinde-Schnellkupplung,
Dauerbetriebstemperaturen 175 °C oder 200 °C - Teil 008:
Schutzhülse für freien Steckverbinder - Produktnorm

This European Standard was approved by CEN on 28 September 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

This international standard was developed in accordance with internationally recognized principles on standardization established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.

 Designation: D3675 – 17

Standard Test Method for Surface Flammability of Flexible Cellular Materials Using a Radiant Heat Energy Source¹

This standard is issued under the fixed designation D3675; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ε) indicates an editorial change since the last revision or reapproval.

1. Scope*

1.1 This is a fire test response standard.

1.2 This test method describes the measurement of surface flammability of flexible cellular materials.

1.3 *This standard measures and describes the response of materials, products, or assemblies to heat and flame under controlled conditions, but does not, by itself, incorporate all factors required for fire hazard or fire risk assessment of the materials, products, or assemblies under actual fire conditions.*

1.4 *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

1.5 *Fire testing is inherently hazardous. Adequate safeguards for personnel and property shall be employed in conducting these tests.*

1.6 Specific information about hazards is given in Section 7.

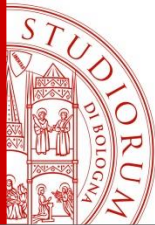

NOTE 1—There is no known ISO equivalent to this standard.

E84 Test Method for Surface Burning Characteristics of Building Materials
E162 Test Method for Surface Flammability of Materials Using a Radiant Heat Energy Source
E176 Terminology of Fire Standards
E1317 Test Method for Flammability of Marine Surface Finishes
E1321 Test Method for Determining Material Ignition and Flame Spread Properties
E1546 Guide for Development of Fire-Hazard-Assessment Standards
IEEE/ASTM SI-10 Standard for Use of the International System of Units (SI): The Modern Metric System
2.2 ISO Standards:³
ISO 13943 Fire Safety—Vocabulary

3. Terminology

3.1 Definitions:

3.1.1 For definitions of terms used in this test method, refer to the terminology contained in Terminology E176 and ISO 13943.

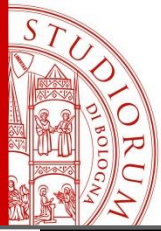

La semantica degli standard

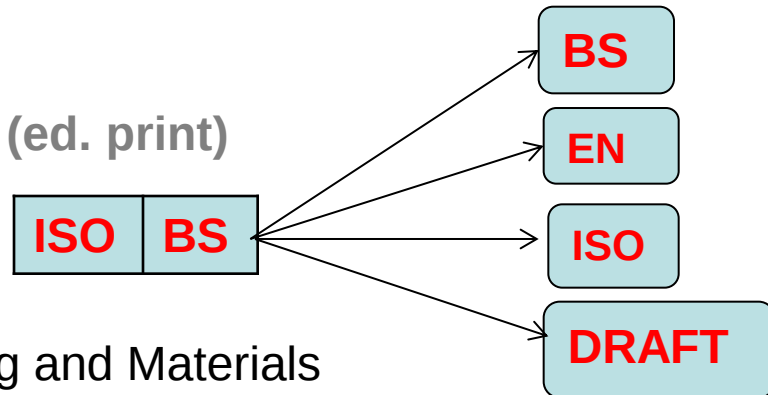

ICS - International Classification for Standards

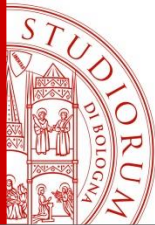

- ICS è una classificazione pubblicata dall'ISO e organizzata gerarchicamente su 3 livelli.
- Il primo livello definisce i settori fondamentali di applicazione delle norme, i due successivi sono gruppi e sotto gruppi più specifici.
- Alla classe espressa in numero si affianca un corrispettivo verbale.
 - **49 AIRCRAFT AND SPACE VEHICLE ENGINEERING**
 - 49.020 Aircraft and space vehicles in general
 - * Including aircraft performance, flight dynamics, etc.
 - * Air transport, see **03.220.50**
 - 49.025 Materials for aerospace construction
 - 49.025.01 Materials for aerospace construction in general
 - 49.025.05 Ferrous alloys in general
 - 49.025.10 Steels
 -
 - 49.025.60 Textiles
 - * Including textile glass and coated

Come nasce una norma UNI

- Studio di fattibilità a cura di un gruppo di lavoro preposto dall'organismo di normazione a seguito di una esigenza manifestata dal mercato, dalle istituzioni, dai consumatori o dagli stessi organi tecnici UNI ([inchiesta pubblica preliminare](#))
- Stesura della bozza a cura dei Comitati Tecnici
- [Inchiesta pubblica](#)
- Pubblicazione a seguito dell'esame finale e dell'approvazione della Commissione Centrale Tecnica

UNI

<http://www.uni.com/>

The screenshot displays the homepage of the UNI website. The browser's address bar shows the URL www.uni.com/. The page features the UNI logo (a stylized 'U' with a dot) and the text 'ENTE ITALIANO DI NORMAZIONE'. Navigation links include 'Home', 'Chi siamo', 'Associazione', 'Normazione', 'Catalogo', 'Formazione', 'Aree di lavoro', and 'Notizie'. The main content area is divided into three columns: 'Associazione' (with an icon of three people), 'Normazione' (with an icon of a hand holding a pencil), and 'Catalogo' (with a list of quick links: Norme, Abbonamenti, Centro di Formazione, Le prassi pubblicate, and Prodotti editoriali). Below the main content, there is a section titled 'In Vetrina' (In the Window) featuring a news item about the signing of an agreement between UNI and the National Council of Geometricians and Geometricians Laureates. A yellow banner with the text 'scopri l'offerta!' (discover the offer!) is also visible. The footer shows the date and time: 14:32 13/02/2017.

Inchiesta pubblica preliminare e finale

The screenshot shows the homepage of the UNI (Ente Italiano di Normazione) website. The header includes the UNI logo, navigation links (Home, Chi siamo, Associazione, Normazione, Catalogo, Formazione, Aree di lavoro, Notizie), and buttons for 'Accedi' and 'Associati'. A search bar is also present.

The 'Normazione' section is highlighted, featuring a diagram of the public inquiry process. The diagram shows a flow from 'Cosa è una norma' to 'Inchiesta pubblica preliminare' and 'UNI: inchiesta pubblica finale'. Arrows indicate the flow between these steps and other related topics like 'Politica europea sulla normazione' and 'Normazione e professioni non regolamentate'.

Below the diagram, there are three large blue boxes with icons and labels:

- Associazione**: Icon of three people.
- Normazione**: Icon of a notepad and pencil.
- Catalogo**: Icon of a shopping cart.

The URL www.uni.com/# is visible in the bottom left corner.

Codice progetto proposto: UNI1602712 (**Inchiesta terminata**)

Titolo: Infrastrutture del gas Stazioni di controllo della pressione e di misura del gas, connesse con le reti di trasporto Parte 2: Impianti di controllo della pressione del gas - Progettazione, costruzione e collaudo

Sommario: La norma fornisce, in conformità alla legislazione vigente, i criteri principali di progettazione, costruzione e collaudo degli impianti di controllo della pressione dei gas combustibili della prima e della seconda famiglia, come definiti nella UNI EN 437, allacciati alle reti di trasporto gas a valle del punto di riconsegna dal Trasportatore al Distributore/Cliente finale. La norma si applica agli impianti di controllo della pressione di nuova realizzazione e al rifacimento parziale o totale di quelli esistenti. La norma integra le disposizioni della UNI EN 12186 per gli aspetti legati al proprio campo di applicazione.

Giustificazioni: La revisione della norma si rende necessaria per aggiornarla all'evoluzione tecnologica e normativa di specie (UNI EN 12186 e UNI EN 1776) e a renderla coerente con la struttura delle altre norme di settore applicabili.

Benefici attesi: La nuova norma (suddivisa in parti) tiene conto dei recenti sviluppi delle norme europee, si struttura in coerenza con le norme specifiche di settore, distinguendo i requisiti relativi al controllo della pressione del gas da quelli relativi alla misura.

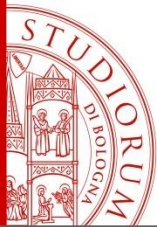

Organo tecnico di riferimento: CIG - Distribuzione

Ricerca Avanzata del Catalogo

La ricerca avanzata consente di restringere la ricerca in modo mirato attraverso molteplici criteri, utilizzabili anche in maniera combinata (tipo di norma, stato, parola chiave, codice norma, titolo, sommario, data di entrata in vigore o di ritiro, codice ICS, commissione tecnica ecc...).

Il campo di ricerca per "Parola chiave" consente una ricerca simultanea nei campi "norma", "codice", "titolo" e "sommario".

FAQs

Specsavers on how to use BSOL

Specsavers use standards to inform all aspects of their business, from the medical standards to those covering environmental and quality management systems and health and safety. Discover advantages that BSOL has given to Specsavers and how using this platform has made the task of standards management easier.

Read more

At a glance: SPECSAVERS AND STANDARDS

SPECSAVERS HAS:

- 31 million customers
- Sold 374 million contact lenses
- Sold 173 million frames (glasses)
- 2,300 partners worldwide
- More than 30,000 people working across its stores, support offices and supply chain

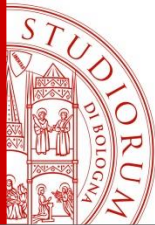

The new BSI Standards Development Portal is now here

This easy-to-use information and review tool offers increased visibility of the way standards are made. It will help you:

- Browse and track standards in development of interest to you and your organization
- Discover and comment on proposed and draft standards
- Find out information about BSI committees such as their membership and standards they are working on
- Suggest ideas for new standards work

Find out more.

La ricerca per codice

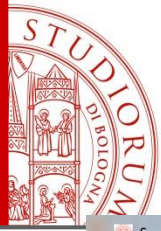

The screenshot shows the BSOL British Standards Online website. The browser address bar displays <https://bsol.bsigroup.com>. The page header includes the BSI logo, the text "BSOL Standards Online", and a "Contact us" link with the phone number "+44 345 086 9001". A "Logout" button is visible next to the user name "Welcome Care Segreteria - BOLOGN".

The main navigation bar includes links for "Home", "My Account", "Browse for Standards", "My Favourites", and "Help and FAQs". A left sidebar contains sections for "My Subscription" (listing BSI MOD and ISO MOD with 53 modules each), "About Standards", "Free Training", "Standards Help: BSI Knowledge Centre", and "FAQs".

The central content area features a "BSOL content enhancements" section with a "Find out more" button. Below this is a "New additions" section with a cityscape illustration and a "Find out more" button. A search box on the right side of the page shows the search term "11799". The search results display "BSOL Suggestions" for "bs iso 11799:2015" and "iso 11799:2003", with a "Turn suggestions OFF" link. Two blue callout boxes with arrows point to these results: "Solo in BSI" points to "bs iso 11799:2015" and "Solo in ISO" points to "iso 11799:2003".

Below the "New additions" section, a red banner states "The new BSI Standards Development Portal is now here". This is followed by a description of the portal's features and a "Find out more" link. A "Free BSOL Training" section is also present, detailing the training options for subscribers.

The Windows taskbar at the bottom shows various application icons, including Internet Explorer, File Explorer, and Microsoft Word. The system clock indicates the time is 13:29 on 22/02/2018.

Browse for Standards

About browse

The Browse area helps you to look through the whole BSI catalogue. You can browse by BSOL subscription module or by subject (ICS codes). ICS (International Classification of Standards) codes are a subject-based classification system for standards.

When you select a module or a subject in browse you'll be taken to a list of matching standards, which you can further filter using the "Refine your search" features on the left-hand side of the results page.

BSOL Modules

Subject matter experts have grouped together the standards on BSOL into modules to make it easier to find what you are looking for.

Browse by BSI, ISO and IEC Modules, ASTM Modules or Book Collections catalogues.

ICS Codes

The **ICS (International Classification for Standards)** is the structure for classifying international, regional and national standards and other normative documents.

You can use ICS codes to Browse by subject.

18/30372576 DC

BS EN 4708-108. Aerospace series. Sleeving, heat-shrinkable, for binding, insulation and identification. Part 108. Limited fire hazard sleeving. Temperature range -65°C to 150°C. Product Standard View details

Status: Current, Draft for public comment | Published 29/01/2018

17/30357883 DC

BS IEC 60695-2-14. Fire hazard testing. Part 2-14. Glowing/hot-wire based test methods. Glow-wire ignition temperature test method for end products. View details

Status: Current, Draft for public comment | Published 10/08/2017

18/30356709 DC

BS 7974. Application of fire safety engineering principles to the design of buildings. Code of practice. Part 0: Guide to design framework and fire safety engineering procedures View details

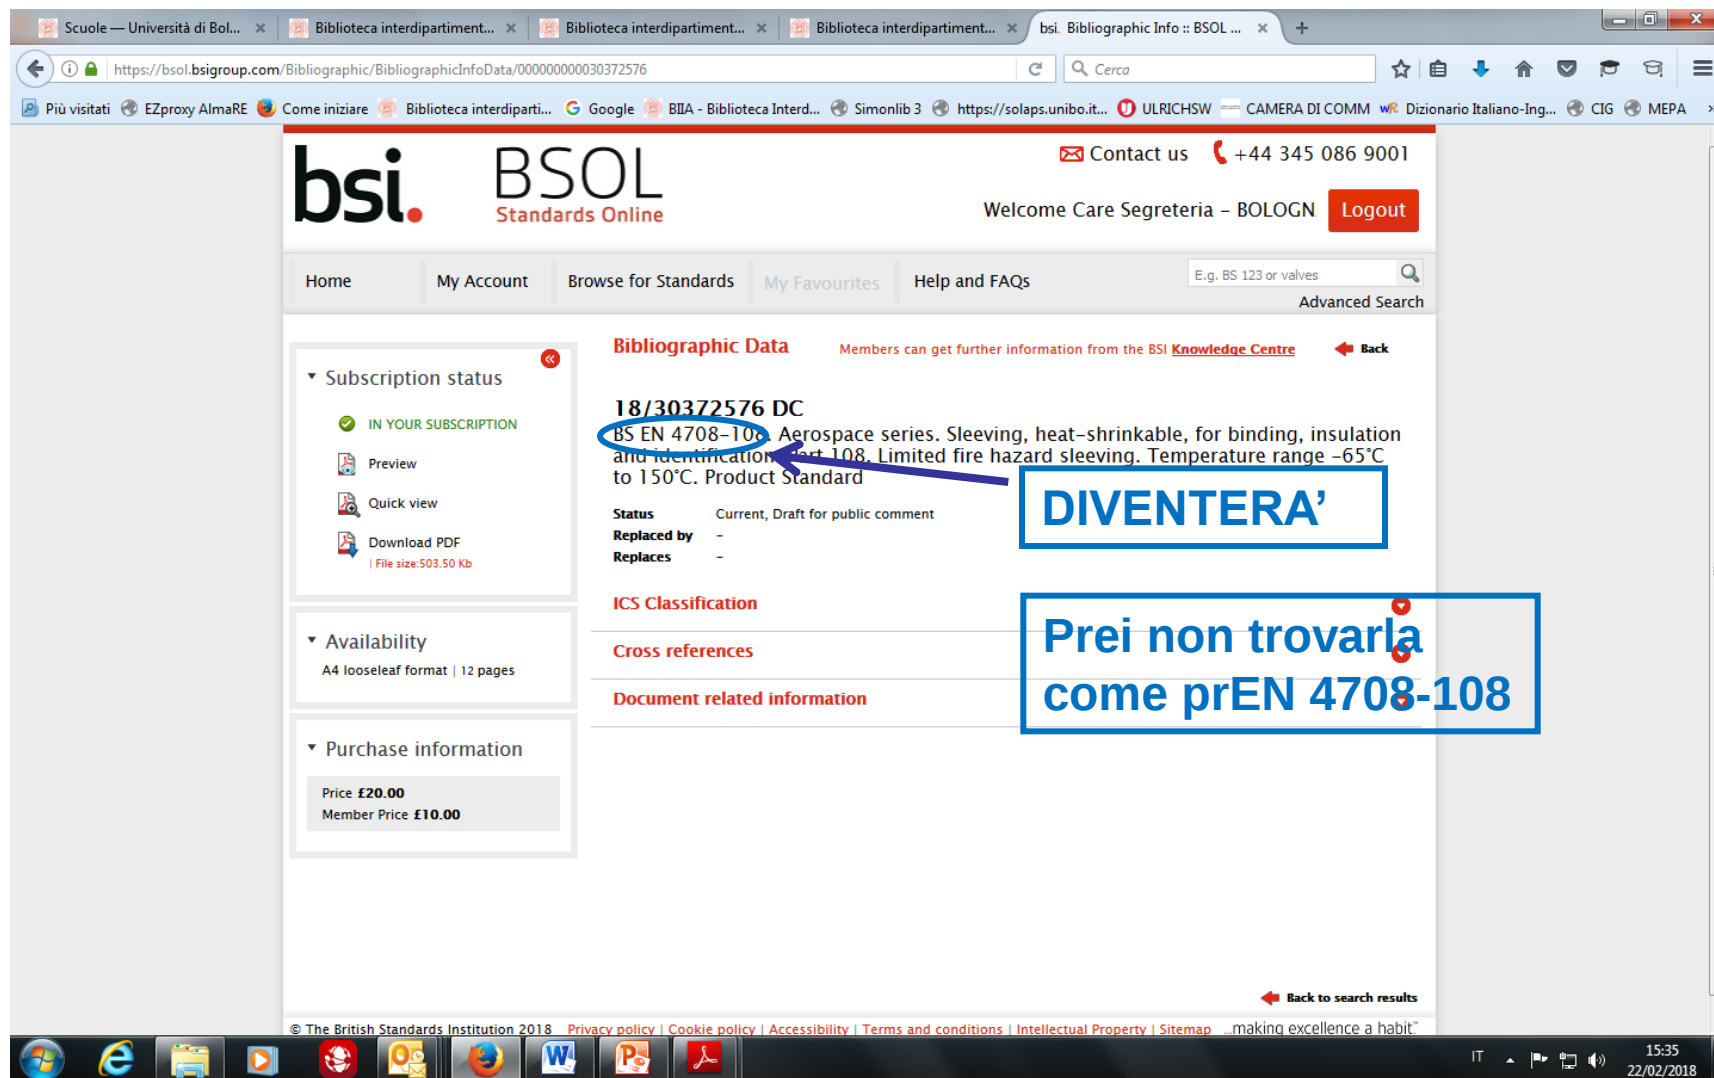

Status: Current, Draft for public comment | Published 12/02/2018

17/30358567 DC

BS EN ISO 19353 AMD1. Safety of machinery. Fire prevention and fire protection. View details

Status: Current, Draft for public comment | Published 22/11/2017

https://bsol.bsigroup.com/Bibliographic/BibliographicInfoData/000000000030358567

The screenshot shows the BSI BSOL Standards Online website. The browser address bar displays the URL: <https://bsol.bsigroup.com/Bibliographic/BibliographicInfoData/00000000030372576>. The website header includes the BSI logo, "BSOL Standards Online", and a "Contact us" button with the phone number +44 345 086 9001. A welcome message for "Care Segreteria - BOLOGNA" and a "Logout" button are also present.

The main navigation bar includes links for "Home", "My Account", "Browse for Standards", "My Favourites", and "Help and FAQs". A search bar with the text "E.g. BS 123 or valves" and an "Advanced Search" button is located on the right.

The left sidebar contains three sections:

- Subscription status**: Includes a green checkmark indicating "IN YOUR SUBSCRIPTION", and links for "Preview", "Quick view", and "Download PDF" (File size: 503.50 Kb).
- Availability**: Shows "A4 looseleaf format | 12 pages".
- Purchase information**: Lists "Price £20.00" and "Member Price £10.00".

The main content area displays the "Bibliographic Data" for the standard **18/30372576 DC**. The title is **BS EN 4708-108 Aerospace series. Sleeving, heat-shrinkable, for binding, insulation and identification. Part 108. Limited fire hazard sleeving. Temperature range -65°C to 150°C. Product Standard**. The status is "Current, Draft for public comment". The "Replaced by" and "Replaces" fields are empty.

Below the title, there are sections for "ICS Classification", "Cross references", and "Document related information".

Two blue boxes with red arrows highlight specific information:

- A box labeled **DIVENTERA'** points to the "Draft" status in the title.
- A box labeled **Prei non trovarla come prEN 4708-108** points to the "18/30372576 DC" identifier.

The footer of the website includes the text "© The British Standards Institution 2018" and links for "Privacy policy", "Cookie policy", "Accessibility", "Terms and conditions", "Intellectual Property", and "Sitemap". The bottom right corner shows the date "22/02/2018" and the time "15:35".

ITU Telecommunication Standardization Sector

The screenshot shows the ITU-T Recommendations and other publications page. The browser address bar displays the URL <https://www.itu.int/en/ITU-T/publications/Pages/default.aspx>. The page features the ITU logo and the tagline "Committed to connecting the world" in multiple languages. A search bar is present with the placeholder text "What would you like to search for?". The navigation menu includes links to ITU, General Secretariat, Radiocommunication, Standardization, Development, ITU Telecom, Members' Zone, and Join ITU. The main content area is titled "ITU-T Recommendations and other publications" and includes a breadcrumb trail: "YOU ARE HERE > HOME > ITU-T > PUBLICATIONS". The page is divided into three main sections: "THE MAIN PRODUCTS OF ITU-T", "NON-NORMATIVE OUTPUTS", and "ANOTHER ITU-T PRODUCT". The "THE MAIN PRODUCTS OF ITU-T" section states that the main products of ITU-T are normative Recommendations, which are standards that define how telecommunication networks operate and interwork. Recommendations are non-binding, however they are generally complied with due to their high quality and because they guarantee the interconnectivity of networks and enable telecommunication services to be provided on a worldwide scale. The "NON-NORMATIVE OUTPUTS" section states that non-normative outputs include Appendices to Recommendations, ITU-T Handbooks, Implementer's guides and Supplements. The "ANOTHER ITU-T PRODUCT" section states that another ITU-T product is the Operational Bulletin, which is a fortnightly detailed update containing information that is required to maintain the global interconnection of the world's telecommunication networks. The "ITU-T RECOMMENDATIONS" section states that there are over 4000 ITU-T Recommendations in force on topics from dial-up modems to Gbit/s optical transmission systems, next-generation networks, future networks, web services, cloud computing, ubiquitous sensor networks, e-health, climate change and IP-related issues. The "TECHNICAL PAPERS" section states that technical papers contain non-normative information on various topics addressed by the ITU-T Study Groups. They are freely available and published, with small editorial overhead, in a light, electronic-only format for quick consumption. These publications cover varied areas of study, such as accessibility in standards, e-health, mobility, objective video quality assessment and outside plant installation. The "LATEST PUBLICATIONS" section lists three publications: ITU-T I.570 (01/2018) - Prepublished in English, ITU-T Y.3650 (01/2018) - Prepublished in English, and ITU-T Y.3150 (01/2018) - Prepublished in English. The footer of the page shows the system clock as 15:03 on 02/02/2018.

ITU-T Recommendations and other publications

YOU ARE HERE > HOME > ITU-T > PUBLICATIONS

SHARE

The main products of ITU-T are normative Recommendations. Recommendations are standards that define how telecommunication networks operate and interwork. ITU-T Recommendations are non-binding, however they are generally complied with due to their high quality and because they guarantee the interconnectivity of networks and enable telecommunication services to be provided on a worldwide scale.

Non-normative outputs include Appendices to Recommendations, ITU-T Handbooks, Implementer's guides and Supplements.

Another ITU-T product is the Operational Bulletin, which is a fortnightly detailed update containing information that is required to maintain the global interconnection of the world's telecommunication networks.

ITU-T RECOMMENDATIONS

There are over 4000 ITU-T Recommendations in force on topics from dial-up modems to Gbit/s optical transmission systems, next-generation networks, future networks, web services, cloud computing, ubiquitous sensor networks, e-health, climate change and IP-related issues.

TECHNICAL PAPERS

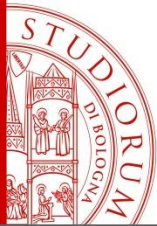

Technical papers contain non-normative information on various topics addressed by the ITU-T Study Groups. They are freely available and published, with small editorial overhead, in a light, electronic-only format for quick consumption. These publications cover varied areas of study, such as accessibility in standards, e-health, mobility, objective video quality assessment and outside plant installation.
