

# Servizi Web of Science con focus su risorse per l'Area Umanistica

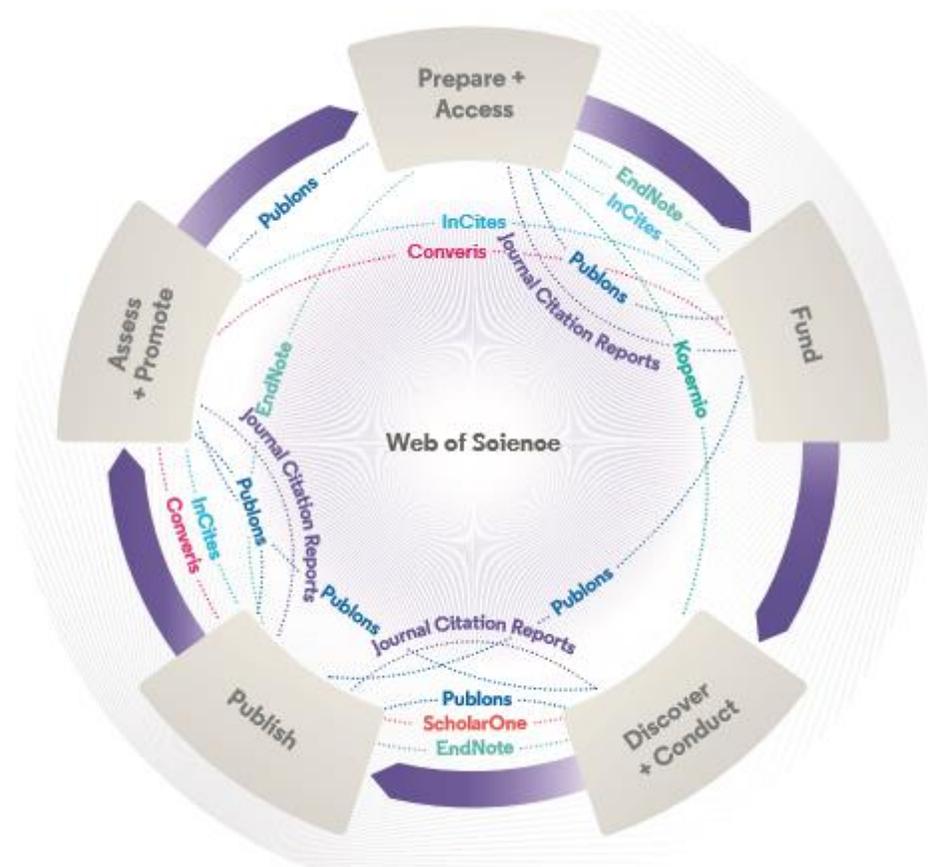

Aprile 2020

# Agenda

1. Choose the right database for your search
2. Master the keyword search
3. Filter your results and analyze for trends
4. Explore the citation network
5. Save your searches and set up alerts

# The literature research workflow

The Web of Science Group supports the entire research workflow

## Web of Science

The world's largest and highest quality publisher-neutral citation index.

## InCites Benchmarking & Analytics

Analyze institutional productivity and benchmark your output against peers worldwide.

## ScholarOne

Simplified submission workflows and peer review for scholarly publishers and societies.

## Essential Science Indicators

Reveals emerging science trends as well as influential individuals, institutions, papers, journals, and countries across 22 categories of research.

## Journal Citation Reports

The world's most influential and trusted resource for evaluating peer-reviewed publications.

## EndNote

A smarter way to streamline references and write collaboratively.

## Kopernio

Fast, one-click access to millions of high-quality research papers.

## Converis

One flow to let institutions collect, manage, and report on all research activity, working seamlessly with an institutions existing systems.

## Web of Science Author Connect

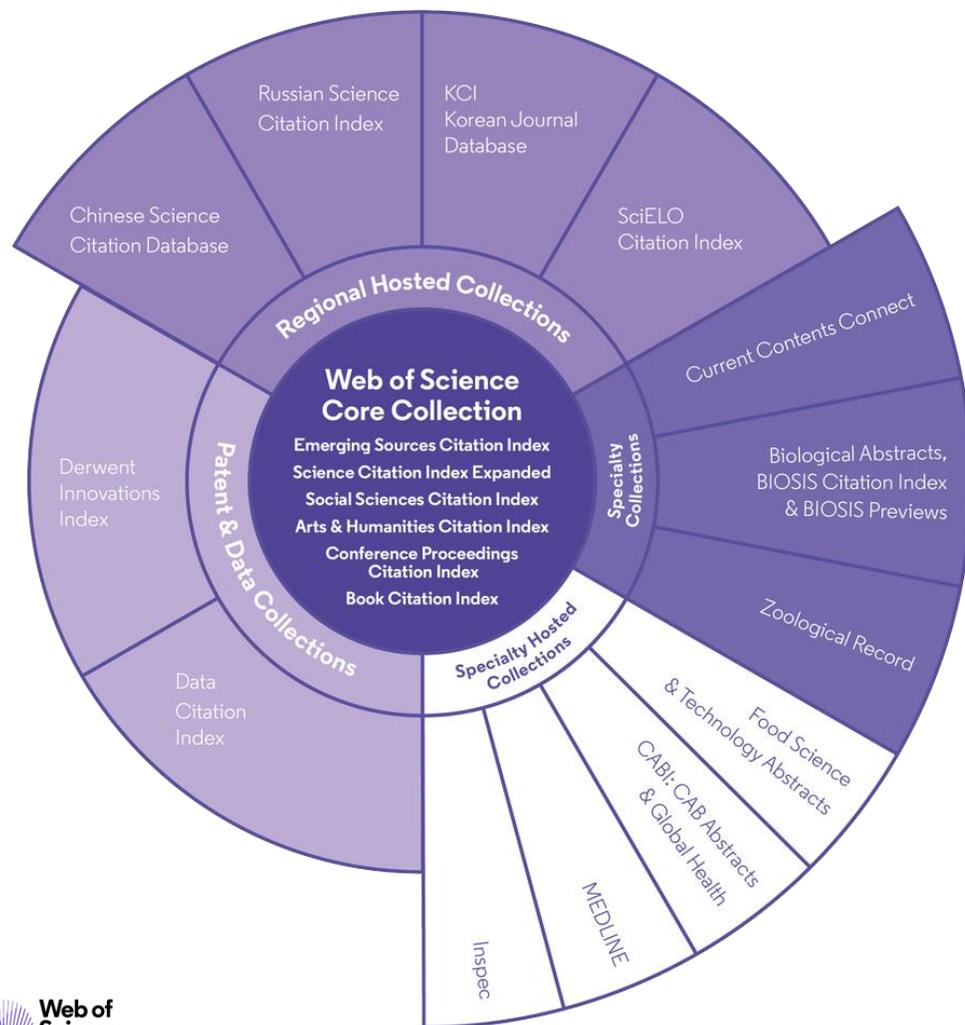

Reach leading researchers in the sciences, social sciences, and arts and humanities.

## Publons

Supporting researchers through documenting their peer-review and journal editing contributions, providing guidance and best practice for the peer-review process, as well as increasing the overall visibility of their research and its impact.

# Web of Science Platform

Multidisciplinary research experience across the sciences, social sciences, and arts and humanities

**34,000+**

Journals across the platform

**87 million**

Patents for over 43 million inventions

**21,000+**

Total journals in the *Core Collection*

**10.7 million+**

Data Sets and Data Studies

**1.8 billion+**

Cited references

**Backfiles to 1900**

With cover-to-cover indexing

**169 million+**

Records

**218,000+**

Conference proceedings

**14 million**

Records with funding data

Books

# Web of Science Core Collection

Research with confidence using a publisher-neutral citation index

Science Citation Index Expanded

Social Sciences Citation Index

Arts & Humanities Citation Index

Emerging Sources Citation Index

Conference Proceedings Citation Index

Book Citation Index

**21,000+ journals indexed cover-to-cover**

- Multidisciplinary
- International
- Influential

**Powerful citation network with complete cited reference search**, cited reference linking and navigation

**Unbiased journal selection and curation**

# Web of Science Core Collection

Research with confidence using a publisher-neutral citation index

**Science Citation Index Expanded • 9,215 journals**

**Social Sciences Citation Index • 3,409 journals**

**Arts & Humanities Citation Index • 1,829 journals**

**Emerging Sources Citation Index • 7,938 journals (1,426 in Arts & Humanities)**

**Conference Proceedings Citation Index • 218,912 conferences**

**Book Citation Index • 111,562 books**

# Web of Science Core Collection

Research with confidence using a publisher-neutral citation index

## 456 ITALIAN JOURNALS

### Science Citation Index Expanded

- 159 journals

### Social Sciences Citation Index

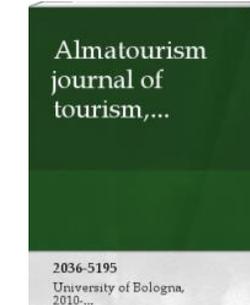

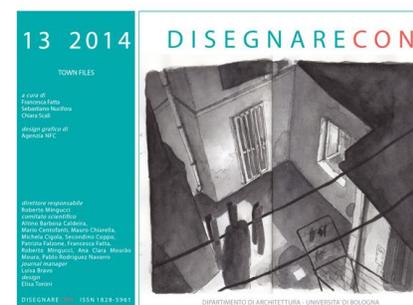

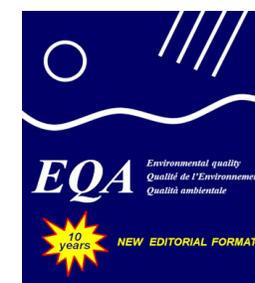

- 20 journals

### Arts & Humanities Citation Index

- 66 journals

### Emerging Sources Citation Index

- 282 journals (111 in Arts & Humanities)

# Web of Science Core Collection

## Book Citation Index

- **Book Citation Index– Science (BKCI-S) -- 2005-present**
- **Book Citation Index– Social Sciences & Humanities (BKCI-SSH) -- 2005-present**

The **Book Citation Index** includes the published scholarly literature of **books** (series and non-series) and **book chapters** selected by our editorial staff.

**Book citations** are seamlessly integrated with other citation indexes in the Web of Science platform to provide a complete citation count of an author's published work. These citations are included in the overall citation count of a published work.

*Note: Textbooks, Encyclopedias, Reference Books are not included in the Book Citation Index.*

## Could you please add something on Books (BKCI) (also looking at some statistics)

The *Book Citation Index* includes the published scholarly literature of books and book chapters selected by our editorial staff.

Book citations are seamlessly integrated with other citation indexes in the *Web of Science* platform to provide a complete citation count of an author's published work. These citations are included in the overall citation count of a published work. Use these indexes to track who is citing your published works and the published works of your peers.

**Note:** Textbooks, Encyclopedias, Reference Books are not included in the *Book Citation Index*.

# Master Journal List <https://mjl.clarivate.com/>

Browse, search, and explore journals indexed in the Web of Science

## IMPROVED SEARCH FUNCTIONALITY

Search across 24,000+ journals across 254 subject disciplines.

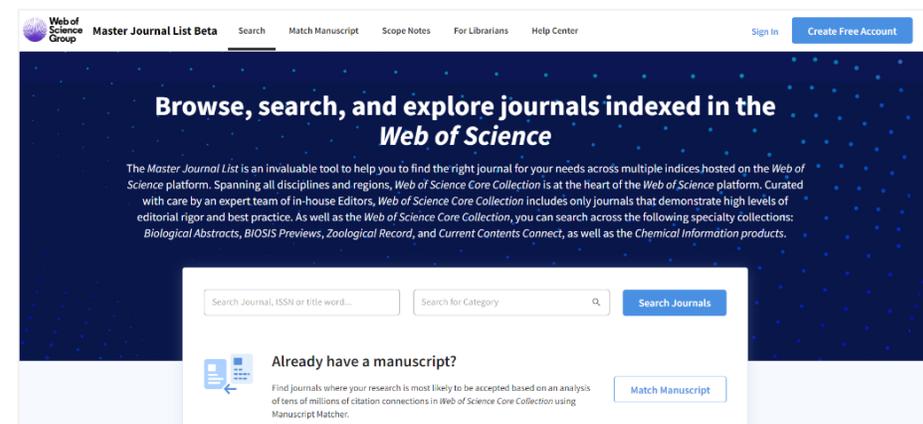

## MANUSCRIPT MATCHER

Find the best fit for your manuscript powered by Web of Science data.

## JOURNAL PROFILES

Access key information about and metrics for a comprehensive journal overview.

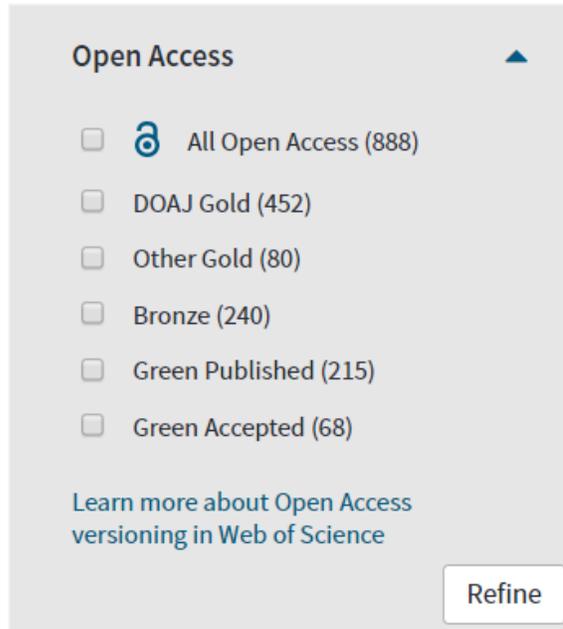

## How do you avoid predatory Open Access?

Web of Science is the trusted whitelist for Open Access, comprising curated journal collections that carefully aim to exclude predatory journals. Users can therefore search and access millions of trusted peer-reviewed OA articles with confidence across the Web of Science, while also identifying OA journals to publish in. <https://unpaywall.org/sources>

# Access to Full text: Open Access

Helping the research community discover, evaluate and access high-quality Open Access content

Open Access

- All Open Access (888)
- DOAJ Gold (452)
- Other Gold (80)
- Bronze (240)
- Green Published (215)
- Green Accepted (68)

[Learn more about Open Access versioning in Web of Science](#)

Refine

- **DISCOVER AND ACCESS TRUSTED PEER-REVIEWED OA WITH CONFIDENCE**
- **LIMIT YOUR FULL TEXT SPENDING WITH SEAMLESS ACCESS TO MILLIONS OF OA ARTICLES**
- **ACCESS LEGAL VERSIONS OF THE FULL TEXT STORED AND SHARED IN REPOSITORIES (GREEN OA)**

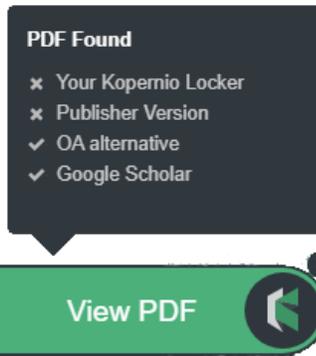

To support any types of analysis, Web of Science has introduced the different OA versions of articles, as per [Unpaywall](#) application: [DOAJ Gold](#), [Other Gold \[e.g. Hybrid\]](#), [Bronze](#), [Green \(Accepted & Published\)](#). All identified OA versions for an article are stored rather than just one. We will still preference the link to the “best” version: version of Record at the publisher website when available.

# Access to Full text: Kopernio

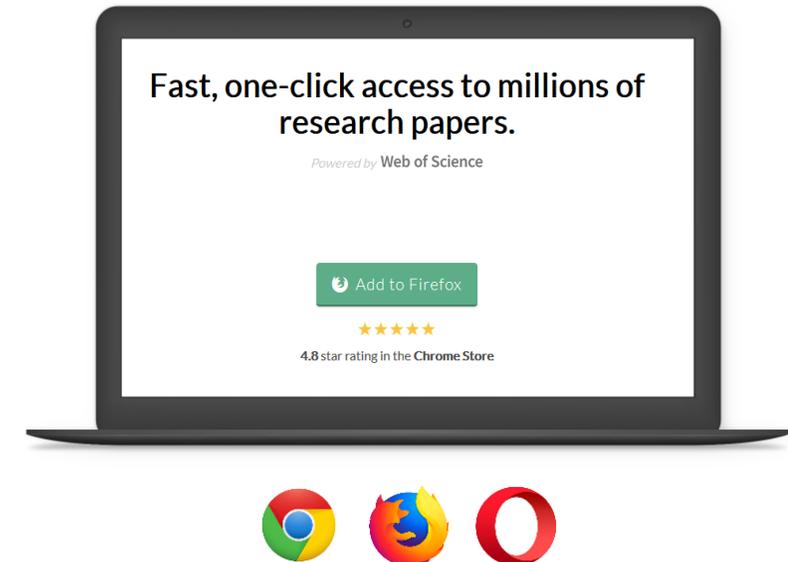

A browser plugin that finds the best available PDF of an academic article while you browse.

Behind the scenes Kopernio will search (where possible) your institution's subscriptions and open databases to find the best version of the paper for you.

When Kopernio is able to find at least one version of the PDF, it displays the green indicator. This can be clicked to view the PDF in the Locker. Hovering over the indicator shows where Kopernio found PDFs.

When Kopernio is not able to find at least one version of the PDF, it displays this new indicator. When this is clicked, the site's preferred solution is actioned. Hovering over the indicator shows the site's preferred message.

# Agenda

1. Choose the right database for your search
2. Master the keyword search
3. Filter your results and analyze for trends
4. Explore the citation network
5. Save your searches and set up alerts

# Select a database

The screenshot displays the Web of Science interface. At the top left, the text "Web of Science" is visible. In the top right corner, the Clarivate Analytics logo is present. A navigation bar contains the following items: "Tools", "Searches and alerts", "Search History", and "Marked List". On the left side, there is a "Select a database" dropdown menu currently set to "Web of Science Core Collection". Below this menu, a list of database options is shown, including "All Databases", "Web of Science Core Collection", "Biological Abstracts", "BIOSIS Citation Index", "BIOSIS Previews", "CABI: CAB Abstracts® and Global Health®", "Chinese Science Citation Database SM", "Current Contents Connect", and "Data Citation Index". To the right of the dropdown, a tooltip for "Web of Science Core Collection (1900-present)" provides details: "Search the world's leading scholarly journals, books, and proceedings in the sciences, social sciences, and arts and humanities and navigate the full citation network." Below this, a list of features is provided: "All cited references for all publications are fully indexed and searchable.", "Search across all authors and all author affiliations.", "Track citation activity with Citation Alerts.", "See citation activity and trends graphically with Citation Report.", and "Use Analyze Results to identify trends and publication patterns." On the right side of the interface, there is a search bar with the text "Try our new Author Search BETA", a "Search" button, and a "Search tips" link. A red box highlights the dropdown menu, and a red arrow points from a red box at the bottom labeled "Select a database" to the dropdown menu.

Select a database

# Web of Science Core Collection | Basic Search

## Search Fields

- Topic
- Title
- Author
- Author Identifiers
- All Fields
- Group Author
- Editor
- Publication Name
- DOI
- Year Published
- Address
- Organizations-Enhanced
- Conference
- Language
- Document Type
- Funding Agency
- Grant Number
- Accession Number
- PubMed ID

Fields mined to return results in a common **Topic Search**:

1. The **Title** of the article, review, proceeding, book, etc.
2. The **Abstract**, which is the work's summary containing the key points discussed such as research question, methodology, discussion and conclusion. This field is supplied by the author(s) of the article or paper.
3. The **Keywords** and **Keywords Plus** fields: The keywords field is the one supplied by the author(s) and "tags" the main and sub topics of the paper's content. The keywords plus field is an algorithm that provides expanded terms stemming from the record's cited references or bibliography.

# Web of Science Core Collection | Organization Search

The screenshot shows the Web of Science interface. At the top left is the 'Web of Science' logo. At the top right is the 'Clarivate Analytics' logo. Below the logo is a navigation bar with 'Tools', 'Searches and alerts', 'Search History', and 'Marked List'. The main search area has a 'Select a database' dropdown menu with 'Web of Science Core Collection' selected, highlighted by a red box and a blue circle with the number '1'. To the right of this is a notification banner: 'Access free resources to support coronavirus research.' Below the database selection are search tabs: 'Basic Search', 'Author Search<sup>BETA</sup>', 'Cited Reference Search', 'Advanced Search', and 'Structure Search'. The 'Basic Search' tab is active. Below the tabs is a search input field containing 'Example: Johns Hopkins University' and a search button. To the right of the input field is a dropdown menu with 'Organization-Enhanced' selected, highlighted by a red box and a blue circle with the number '2'. Below the dropdown are '+ Add row' and 'Reset' options. Below the search input field is a red box with a blue circle and the number '3' containing the text: 'Select available organizations from the Index. Finds papers from organizations with identified name variants.' Red arrows point from the callout boxes to their respective elements in the interface.

## Organizations - Enhanced List

Select the search aid to go to the Organization-Enhanced List where you can view and select preferred organization names and/or their variants.

## Searching the Organizations - Enhanced Field

Search for preferred organization names and/or their name variants from the Preferred Organization Index.

14,000+ UNIFIED ORGANIZATIONS

# Web of Science Core Collection | Author Search

Author Search BETA helps identify and retrieve all documents by a particular author. Author Search helps separate documents by different authors with the same name.

The improved author search allows to submit feedback on publication records, and allows authors to claim and curate their author records.

Search by **Author Name**, with type-ahead functionality

Search by **Web of Science ResearcherID or ORCID**

Basic Search **Author Search**<sup>BETA</sup> Cited Reference Search Advanced Search Structure Search

**Name Search** Web of Science ResearcherID or ORCID Search

Search for an author to see their author record. An author record is a set of Web of Science Core Collection documents likely authored by the same person. You can claim and verify your author record from your author record page.

Last name

First name and middle initial(s)

[Need help searching?](#) ⓘ

Advanced Search enables you to form and combine search sets.

Field tags enable you to search data fields within a record.

# Web of Science Core Collection | Cited Reference Search

Basic Search Author Search <sup>BETA</sup> **Cited Reference Search** Advanced Search Structure Search

Find the articles that cite a person's work.

Step 1: Enter information about the cited work. Fields are combined with the Boolean AND operator.

Example: O'Brian C\* OR OBrian C\* Cited Author

Select from Index

Example: J Comp\* Appl\* Math\* Cited Work

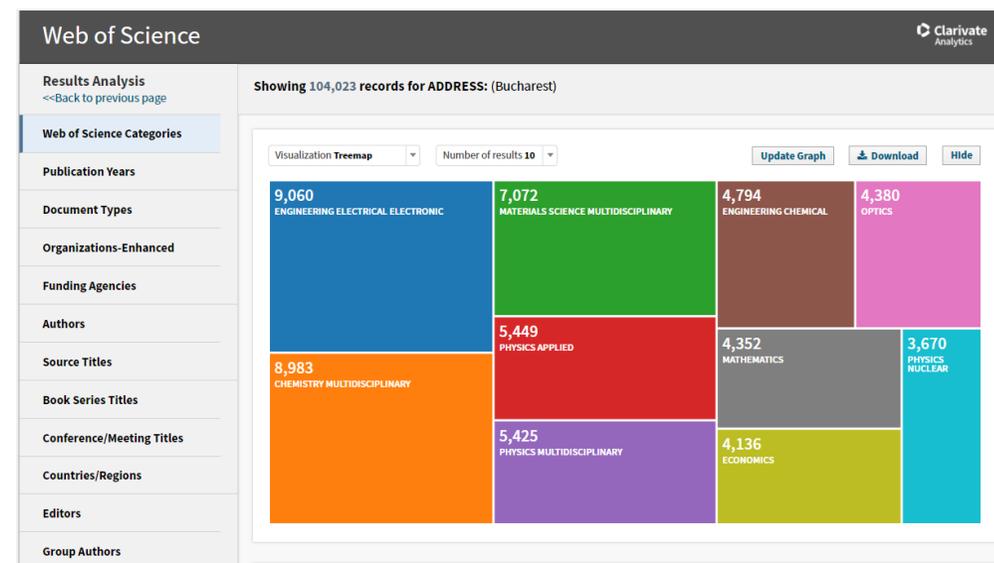

Select from Index  
View abbreviation list

Example: 1943 or 1943-1945 Cited Year(s)

Search

+ Add row | Reset

Search for records that have cited a published work.  
*Check out if you are missing any citations.*

Analyze the citing articles

# All Database search

A topic search at the **All Databases** level helps discover content in formats and document types across all content sets.

The screenshot displays the search interface for 'All Databases'. At the top, a dropdown menu is set to 'All Databases'. Below this, there are three search tabs: 'Basic Search' (selected), 'Cited Reference Search', and 'Advanced Search'. A search input field contains the query '(((covid OR coronavirus OR sars) AND chloroquine)'. Below the search bar is a 'Timespan' dropdown set to 'All years (1864 - 2020)'. To the right of the search bar, there are two refinement panels. The top panel is titled 'Databases' and shows a list of 10 databases with their respective record counts: MEDLINE® (67), Web of Science Core Collection (57), BIOSIS Citation Index (45), BIOSIS Previews (45), Biological Abstracts (39), Current Contents Connect (38), CABI (26), and SciELO Citation Index (1). The bottom panel is titled 'Document Types' and shows a list of 10 document types with their respective record counts: ARTICLE (110), OTHER (40), REVIEW (24), EDITORIAL (19), LETTER (10), ABSTRACT (6), EARLY ACCESS (5), BOOK (3), MEETING (3), and NEWS (3). Both refinement panels include 'Refine', 'Exclude', and 'Cancel' buttons, and a 'Sort these by: Record Count' dropdown menu. A red box highlights the search input field, and red arrows point from it to the 'Databases' and 'Document Types' refinement panels.

A topic search at the All Databases level takes advantage of the specialized indexing systems of each specific resource (MeSH Terms in Medline, Taxonomic Data in BIOSIS, Class and Manual codes in Derwent etc.).

The Clarivate Analytics staff have mapped the specialized vocabularies from each of the different classification systems onto a common indexing backbone called **Research Areas**, which are broadly based on Web of Science Core Collection / Journal Citation Report classifications.

After a topic search at the All Databases level, you can refine by Research Areas and focus on content you are interested in without having to know the specialized vocabularies of each indexing system. For example, a topic search for "heart attack" pulls up more than 16,000 records, and if I refine by "Pathology" under Research Areas, I can go to those documents without having to know the specific MeSH terms those documents were indexed by.

# Agenda

1. Choose the right database for your search
2. Master the keyword search
3. Filter your results and analyze for trends
4. Explore the citation network

## Navigate the citation network to find more relevant results

The **Cited References** count displays the number of documents cited by the current record. Click the link to view the list of cited references. From there you can view the full record of each cited reference. (Access to the full records of cited references may be limited to your institution's subscription.)

The **Times Cited** count is the number of articles in the database that cite the current article. Click the number to go to the list of citing articles.

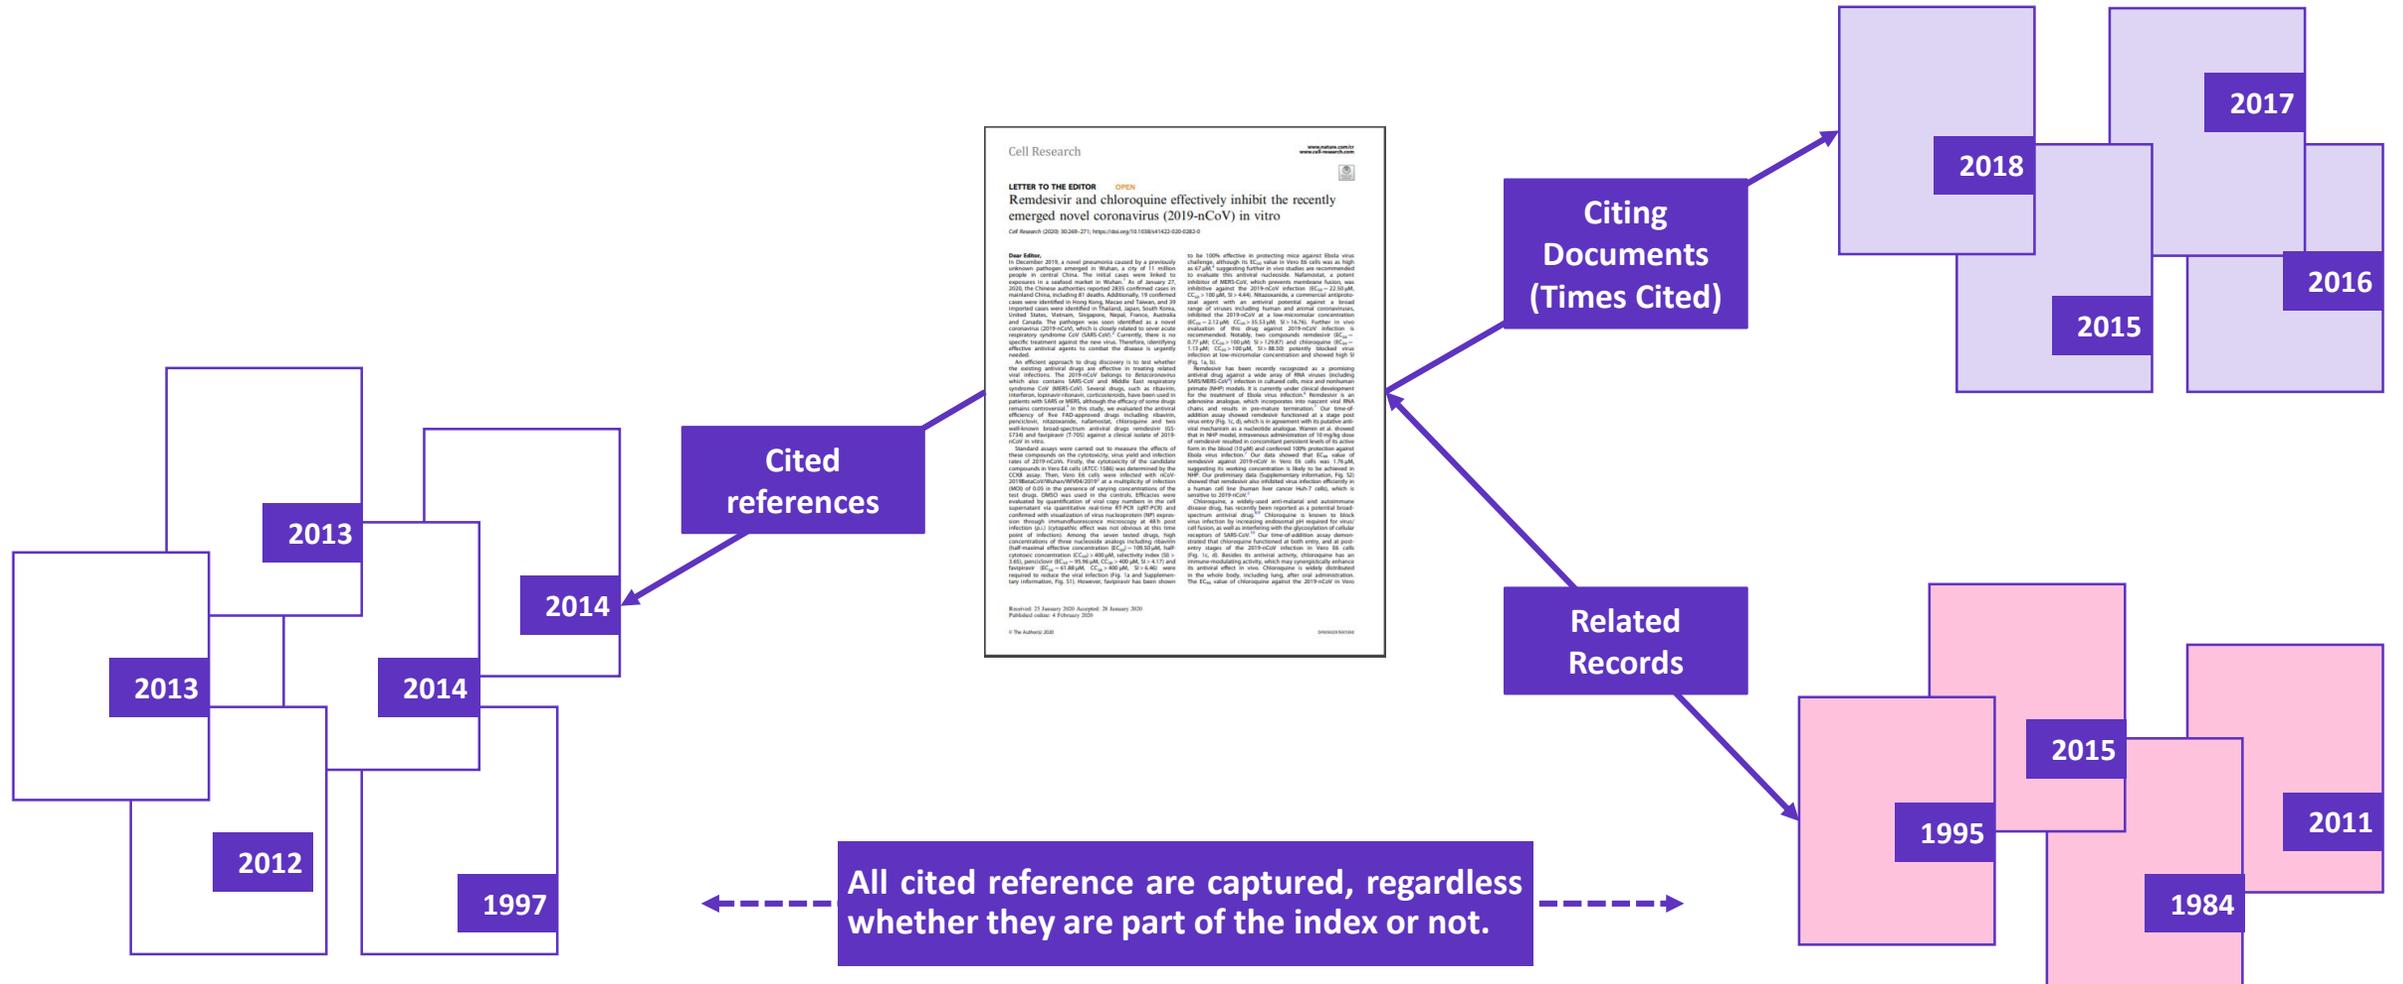

## The Usage Count is a measure of the level of interest in a specific item on the Web of Science platform.

The count reflects the number of times the article has met a user's information needs as demonstrated by clicking links to the full-length article at the publisher's website (via direct link or Open-Url) or by saving the article for use in a bibliographic management tool (via direct export or in a format to be imported later).

Access and store the full-text PDF with the free **Kopernio** browser plugin.

### Insights from nanomedicine into chloroquine efficacy against COVID-19

Chloroquine — an approved malaria drug — is known in nanomedicine research for the investigation of nanoparticle uptake in cells, and may have potential for the treatment of COVID-19.

Tony Y. Hu, Matthew Frieman and Joy Wolfram

Recent multi-centre clinical trials and cell culture studies suggest that the 40-year-old malaria drug, chloroquine, may potentially display therapeutic efficacy against COVID-19 (coronavirus disease-2019), a rapidly spreading viral infection that can cause pneumonia-related death in approximately 2.3% of infected individuals. Based on the preliminary clinical trial findings, chloroquine has been included in national guidelines for treatment of COVID-19 in the People's Republic of China. However, caution should be exercised when making premature interpretations, as clinical trials are still ongoing and interim trial data have not yet been made available. Given the current lack of an approved and effective vaccine for severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), the virus causing COVID-19, it is important to evaluate potential prophylactic and/or therapeutic effects of drugs that are clinically

Fig. 1 Potential mechanism by which chloroquine exerts therapeutic effects against COVID-19.

# L'INFO POINT DI CLARIVATE ANALYTICS IN ITALIA

The screenshot displays the 'Europe - Regional Pages: Italy' page on the Web of Science Group website. The header features the Web of Science Group logo and the text 'A Clarivate Analytics company'. The breadcrumb trail reads 'Clarivate Analytics / LibGuides / Europe - Regional Pages / Italy'. A search bar is located in the top right corner. Below the breadcrumb, there is a navigation menu with tabs for 'Training calendar', 'CZ & SK', 'DACH - Region', 'France', 'Hungary', 'Italy' (selected), 'Poland', 'Portugal', 'Romania', and 'Spain'. The main content area is titled 'Benvenuto' and contains a welcome message in Italian: 'Questo sito è stato progettato per fornire tutte le possibili informazioni sulle novità editoriali e commerciali di Clarivate Analytics e in particolare del Web of Science Group in Italia. Nel caso le informazioni non siano esaustive e/o non presenti non esitare a contattare i tuoi punti di riferimento in Italia:'. Below this message, there are two contact points: 'Massimiliano Carloni - Country Account Manager Italy - [massimiliano.carloni@clarivate.com](mailto:massimiliano.carloni@clarivate.com)' with a small profile picture, and 'Adriana Filip - Trainer & Solutions Specialist Italy - [adriana.filip@clarivate.com](mailto:adriana.filip@clarivate.com)' with another profile picture. At the bottom, there are three sections: 'Informazioni' with a lightbulb icon and the text 'Novità' and 'Informazioni'; 'Cortellis - Life Sciences Solutions' with a lightbulb icon and the text 'Cortellis Solutions'; and 'Prossimi webinar' with a calendar icon and the text 'Aprile'.

# More resources

**YouTube Channel**  
[youtube.com/WoSTraining](https://youtube.com/WoSTraining)

The screenshot shows the YouTube channel page for 'Web of Science Training', which has 6.03K subscribers. The page is divided into two main sections: 'Web of Science Core Collection' and 'Web of Science'. Each section contains a grid of video thumbnails with titles, view counts, and upload dates. For example, in the 'Web of Science Core Collection' section, there are videos like 'Introduction to Author Records' (736 views, 4 months ago) and 'Take control of your author record' (394 views, 4 months ago). The 'Web of Science' section features videos such as 'Web of Science: New Features, November 2018' (4.9K views, 1 year ago) and 'Create a Profile' (2.7K views, 1 year ago).

**Librarian Toolkit**  
[View Toolkit](#)

The screenshot displays the 'Web of Science Group Librarian Toolkit' website. The header includes the Web of Science Group logo and the Clarivate Analytics company logo. The main content area features a large banner with the text 'Web of Science Group Librarian Toolkit' and a navigation menu with links for 'Product Links', 'Resources and Training', 'Open Access', 'Full Text Access Solution', and 'Contact us'. Below the banner, the text reads: 'Confident research begins here. Web of Science Group has remained a publisher-neutral partner to the research community for over half a century, providing research intelligence and workflow solutions to help you understand and expand the reach, value and impact of your library. Web of Science Core Collection content is uniquely selective and our indexing is uniquely consistent. Our independent and thorough editorial process ensures journal quality, while over fifty years of consistent, accurate, and complete indexing has created an unparalleled data structure. Every article and all cited references from every journal have been indexed, creating the most comprehensive and complete citation network to power both confident discovery and trusted assessment. Only the Web of Science Core Collection indexes every piece of content cover-to-cover, creating a complete and certain view of over 115 years of the highest quality research.'

**LibGuides**  
[clarivate.libguides.com/home](https://clarivate.libguides.com/home)

The screenshot shows the 'Web of Science Group: Welcome to our Training Portal' page. The header features the Web of Science Group logo and the Clarivate Analytics company logo. The main content area includes a search bar and a navigation menu with links for 'Welcome to our Training Portal', 'News', and 'Non-English Resources'. Below the navigation, there are three main sections: 'Training options', 'Explore guides by product', and 'Technical Support'. The 'Training options' section lists 'Request Training', 'View Tutorials', and 'EndNote Training Calendar'. The 'Explore guides by product' section lists 'Web of Science Platform', 'InCites Platform', 'EndNote', 'Publons', and 'Kopernio'. The 'Technical Support' section lists 'Get Help Now'. On the right side, there is a 'Training Calendar' for March 2020, showing a calendar grid and a list of upcoming events, including 'Web of Science - personabpage 11 marzo 2020, godz. 10:00-11:00 CET' and 'Ranking czaszpism w bazie Journal Citation Reports 11 marca 2020, godz. 13:00-14:00 CET'.
